

ElecSecure — Executive One-Pager

Annual Town Hall 2026 | Azfar Mushtaq, Managing Director

What is ElecSecure?

A smart electrical safety and energy management platform: hardware device + mobile app + cloud analytics. It helps homes and businesses detect faults early, reduce energy waste, and control electrical systems remotely.

The Problem

Electrical faults are often detected too late. Energy waste is invisible. Smart homes lack integrated electrical protection. Businesses face downtime, safety risk, and rising energy costs.

Our Solution

Safety — Real-time fault detection and arc protection
Savings — Energy insights that reduce waste and bills
Control — Remote monitoring and alerts from anywhere

Market & Business Model

UK market size	£2.4B+ (2023)
Growth rate	12.6% annually
Device price	£300 per unit
Subscription	£49/month
Support services	£115 packages

3-Year Outlook

Year	Customers	Revenue	Status
1	400	£235K	Launch & foundation
2	800	£751K	Profitable (£154K profit)
3	1,500	£1.42M	Market leadership (£448K profit)

What We Need

- 1) Leadership endorsement for phased execution
- 2) Cross-team collaboration where relevant
- 3) Introductions to potential customers and partners

ElecSecure — Making electricity safer, smarter, and more efficient.
